[Construction Delay and Disruption Analysis](#)  
[Construction Quantum Analysis](#)

### Industries

Buildings, Mining and Metals, Oil and Gas, Power and Utilities, Production and Manufacturing, Transportation Infrastructure

### Regional Experience

Americas

Logan Patience is a project management professional with 20 years of experience. He has been appointed as a delay and quantum expert or assisted the named expert on several occasions.

Logan has been cross-examined in court and acted as an expert for disputed projects with values of over \$1 billion in construction arbitration and litigation. He has prepared expert reports for infrastructure projects in the oil and gas, transportation, building, and energy sectors.

Logan has held various senior roles for a multinational construction firm, both as a project manager and contracts manager as well as being accountable for the operations of the buildings division. He has experience in estimating and request for proposal (RFP) management, project scheduling and forecasting, project controls, operations, financial management and reporting (SOX), stakeholder relationship management, cross-functional team collaboration, process improvement, risk management, claims and litigation, and contract review.

Logan specialises in delay, disruption, and quantum disputes. He has prepared analysis for delay and extension to completion dates, change order and damages calculation, disruption quantification, and standard of care matters related to project management.

Logan is an associate of the Canadian Institute of Quantity Surveyors, and a member of the Society of Construction Law and the AACE International. He has been nominated by clients for the WWL future leaders category.
