

Advisory services

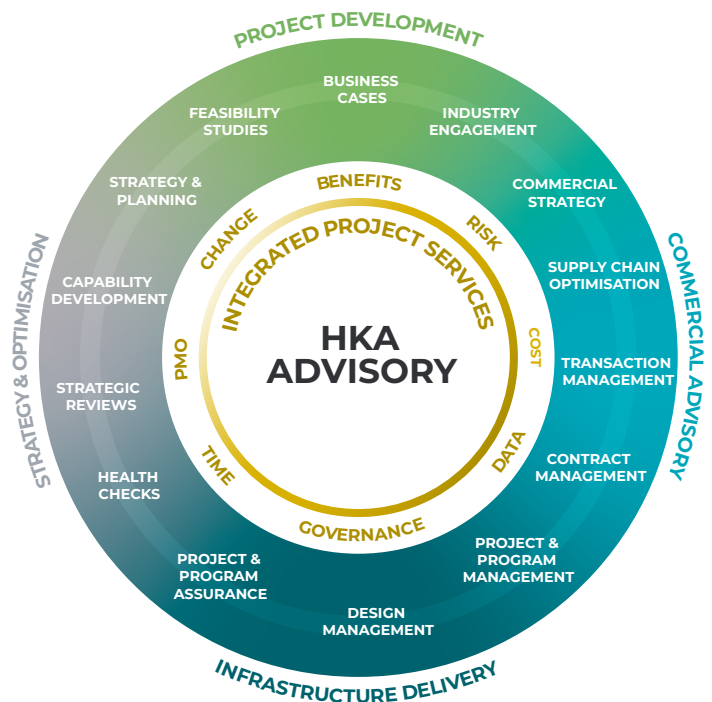

Prevention is better than cure

By providing incisive and timely support at critical stages in your asset's development or investment lifecycle, we help you achieve desired outcomes with more certainty and clarity.

We work as your trusted partner, supporting complex projects, programmes or portfolios with our integrated services, or discrete elements of these services as specialist advisers.

Our people are leading professionals with solid industry experience. They go beyond typical management consultancy to contribute insights, solutions and advice – all grounded in expert analysis and problem-solving on past projects. Understanding what can and does go wrong, they are best placed to set up organisations and projects to succeed.

HKA provides end-to-end advisory services at every level – from project to enterprise – and across the entire infrastructure lifecycle: from strategic planning, development and delivery to claims and disputes.

Our project advisory service offering
